## Trainee/Internship Program Offer

### (10793) Technical & Compliance Project Management – Commerce, TX

**Program Duration:** 18 months  
**Compensation:** \$17.00 per hour  
**Housing:** None  
**Number of Position Offered:** 1

#### Host Company Description:

This host company specializes in large lithium batteries. From golf carts, to powering off-grid solar-powered homes, they install and provide support for a multitude of battery situations and needs. Using lithium technology, the host company is able to provide efficient, long-lasting, and renewable energy solutions.

#### Position Description:

- Support technical project management for PV systems (inverter integration, battery storage, etc.)
- Assist in ensuring product designs and installations meet international and local compliance standards (e.g., IEC, UL, NEC).
- Coordinate testing, certification, and documentation processes for PV and battery systems.
- Collaborate with engineering, quality, and regulatory teams to address compliance issues
- Assist in handling technical and compliance in USA.

#### Applicant Qualifications:

- To apply for the **Trainee** program, applicants must hold **Electrical Engineering, Renewable Energy, Power Electronic** or related degrees and have at least 1 year of professional work experience related to the degree, OR be career professionals of 5 or more years of professional experience in this field
- Excellent English written and verbal communication skills
- Knowledge of PV systems, battery energy storage, inverter technologies, and technical documentation
- Familiarity with compliance standards and certification processes in the energy sector.
- Strong analytical, problem-solving, communication, and project coordination skills.

#### How to Apply:

1. Submit a professional resume with a professional photograph
2. Indicate availability dates (start and end dates)
3. Indicate this offer number and title
